

# **PHASE 1 PROJECT**

**PRESENTED BY BONFACE MANGOKA**

# **DATA ANALYSIS USING PANDAS LIBRARIES**

# BUSINESS PROBLEM

- Microsoft sees all the big companies creating original video content and they want to get in on the fun. They have decided to create a new movie studio, but they don't know anything about creating movies. I am charged with exploring what types of films are currently doing the best at the box office then translate those findings into actionable insights that the head of Microsoft's new movie studio can use to help decide what type of films to create.

# THE DATA

- The data provided was pulled from several sources
- Box Office MojoLinks to an external site.  
IMDBLinks to an external site. Rotten  
TomatoesLinks to an external site.  
TheMovieDBLinks to an external site. The  
NumbersLinks to an external site.
- I used the below data for the project.
- `imdb.title.basics` `imdb.title.ratings`  
`bom.movie_gross`

Average runtime has highest rating

	original_title	start_year	runtime_min	rating
Documentaries have high rating	Freeing Bernie Baran	2010	10	9.0
	Revolution Food	2015	10	8.5
	Hercule contre Hermès	2012	10	8.5
	Requiem voor een Boom	2016	10	8.5
	Fly High: Story of the Disc Dog	2019	10	8.5
	Dedicated Life: Phoebe Brand Beyond the Group	2015	10	8.5
	I Was Born Yesterday!	2015	10	8.5
	Exteriores: Mulheres Brasileiras na Diplomacia	2018	10	8.5
	The Dark Knight: The Ballad of the N Word	2018	10	8.5
	Atlas Mountain: Barbary Macaques - Childcaring...	2015	10	8.5

# CONCLUSION

- Data visualized was sample data

# RECOMENDATIONS

From the data analyzed I would recommend;

- Movies with average minutes because it has the highest ratings.
- Documentary movies since they have the highest ratings.
- Drama movies mostly have poor ratings.
